

Science EAMS	Distance Learning April 27, 2020	Date Name	Period
-----------------	----------------------------------	--------------	--------

Hello again! Welcome to Distance Learning Week #2. This week I will reinforce the rock cycle with an interactive website. I will make an instructional video on how to use this website and show you how to fill out the worksheet. Within this website, we will take a virtual look at some specific rock types. In addition to this activity, you need to print out some diagrams to fill in about the earths crust (instructional video to help).

So there are two assignments this week:

- 1) Rock Cycle Interactive - page118 in your lab book
- 2) Earth's crust diagram - page 119 in your lab book

I miss you guys so much. I will be checking my email regularly, today, Monday so if you have any questions about todays work, I will get back to you as soon as I can. Hang in there and lets learn about rocks.... Time to rock out?? :P
