

How to sketch from a pic using Paper 53

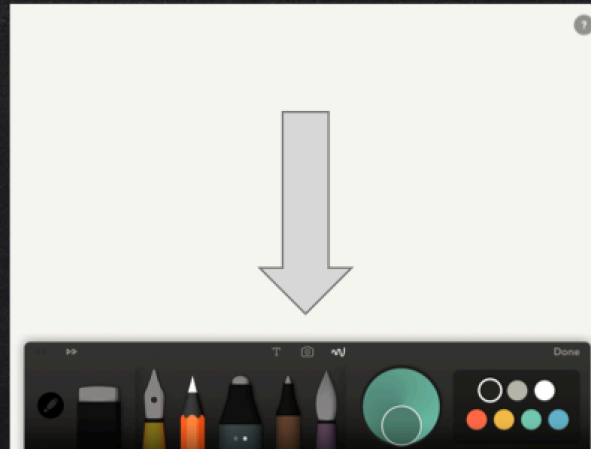

Save final pic in your camera or
google drive.

Getting Started

Find a photo online and save it to your photos.

Open a new Paper file and tap the camera icon.

Tap the photo you want and it will appear on your page.

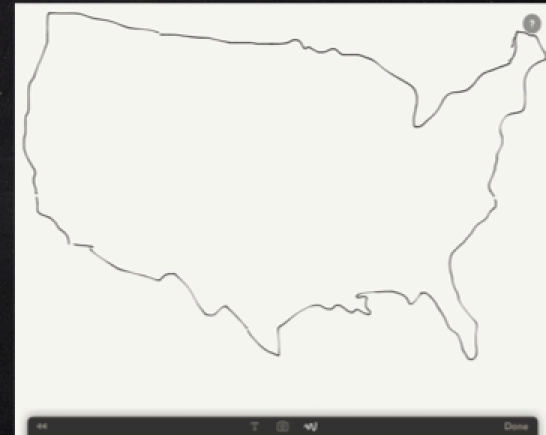

Make the stock image your own

Touch the icon to bring up the art tools. Trace your image.

Once you have it traced, hit the camera icon again and then the trashcan to delete the stock image. You are left with the outline of the image.

Adding the image to your project

Using the art tools,
shade in your
outline.

Click done on the toolbar
and pinch the project
closed to find the “share
button.”

Choose where you
want to send your
new image.
